Correction: Glycogen synthase 1 targeting reveals a metabolic vulnerability in triple-negative breast cancer

E. C. de Heer1†, C. E. Zois2,3,4†, E. Bridges2†, B. van der Vegt5, H. Sheldon2, W. A. Veldman1, M. C. Zwager5, T. van der Sluis5, S. Haider6, T. Morita7, O. Baba7, C. P. Schröder1,8, S. de Jong1, A. L. Harris2 and M. Jalving1*†

Following publication of the original article [1], an error was identified in Additional File 8: Fig. 6c. HCC1806 should have been U87MG. The correct Additional File 8: Fig. 6c caption should be:

(c) Well confluency of U87MG-shCtrl and -shGYs1 cells treated with different concentrations of GTPP, cultured in 5.6 mM glucose complete DMEM, was measured by Incucyte every 3 h.

The correction does not affect the overall Conclusion of the article. The original article has been corrected.
